

## The Logo - January 2012

The project aims to collect the significant elements of each nation through the eyes of the students. The main goal is to develop imagination and creativity, involve students into artistic activities that would raise their creativity fostering cultural awareness, respect and tolerance for other cultures. It allowed freedom in choosing materials, methods, development of imagination, involvement of other subjects to the execution of the topic. The logo of the project was created and used on all the mutual products.

After receiving the photo of the Hand tree, send by Estonian partners, the Portuguese students and an art teacher transform it into a logo, which symbolizes brotherhood and peace. Students experienced different logos and applied them in different merchandising.

It was an activity that promoted active involvement of many school students.

The pictures/drawings of the several logos created by the students were sent to Norway. The school partners, in the mobility to that country, chose the logo to include in all the written documents of the project, t shirts as well as in the Web page. T-shirts were used in many occasions, were given to all students and teachers involved in the project. They also were offered as prizes for competitions and awards at school.
